REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Applicant's claimed invention is allowable over the prior art because the prior art fails to disclose a method for selecting (in an electronic product catalog system) a question to be presented to a user to assist identification of a suitable product by calculating question scores from "product scores" and rule weights.

Tavor (US 6,070,149) discloses a method of determining questions based on product scores of either true or false. However, Tavor fails to disclose applying rule weights as a further calculation to determine the most appropriate question to ask the user. Rofrano (US 6,035, 283) discloses formulating questions to ask users but also fails to disclose applying rule weights as a further calculation to determine the most appropriate question to ask the user.

No single reference or combination of references anticipate or make obvious the claimed invention. Therefore, claims 1,4-8, 10-26, and 29-32 are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The following references are cited of interest:

Japanese Patent Publication (JP 2000-90096) is cited of interest for disclosing an electronic catalog apparatus for storing product information and updating based on questions received from users.

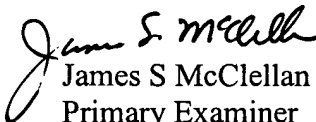

Art Unit: 3627

Himmelstein's (P&G Gives Birth to a Web Baby) article is cited of interest for disclosing an online system that utilizes an interactive question-and-answer process to determine a user's needs.
